

Chehalis Basin Strategy

NOW AVAILABLE

Draft Programmatic Environmental Impact Statement

The Chehalis Basin has experienced both major flooding and substantial degradation of aquatic species habitat. These issues have persisted for almost 100 years without a comprehensive response.

The Department of Ecology is considering potential actions to reduce flood damage and restore habitat for aquatic species. The Chehalis Basin Strategy includes near and long term actions, as well as small and large scale projects.

WE WANT TO HEAR FROM YOU

Ecology is leading an environmental review of different combinations of proposed actions. This draft programmatic State Environmental Policy Act Environmental Impact Statement (EIS) was released on September 29.

Ecology would like your input on the actions analyzed. Learn more about the Chehalis Basin Strategy and the draft EIS.

READ THE DRAFT EIS

- Available online at chehalisbasinstrategy.com
- In-person at libraries in Chehalis, Centralia, Aberdeen and Montesano
