MITIGATED DETERMINATION OF NONSIGNIFICANCE

Description of Proposal: Brandon Rakes on behalf of the Chehalis-Centralia Airport is planning installation of a new aircraft fueling system (and demo of the existing) at the Chehalis-Centralia Airport. By law, the City is required to send notice to all property owners within 300 feet of this area. This may be the only opportunity you have to comment. This property is zoned EPF (A), Essential Public Facility (Airport), and this proposal is a permitted use to support the airport. Lewis County Parcel #005605080001

Proponent: Brandon Rakes, 900 NW Airport Rd Chehalis, WA 98532

Location of Proposal: 900 NW Airport Rd, Chehalis WA 98532

Lead Agency: Chehalis Building and Planning Department

Chehalis Building and Planning Department has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030 (2)(c). This decision was made after review of a completed environmental checklist and other information on file with the City. This information is available to the public on request.

This DNS is issued under WAC 197-11-340(2); the lead agency will not act on this proposal for 14 days from the date below. Comments must be submitted by 4 PM **August 17, 2021**.

Responsible official: Tammy S. Baraconi
Position/title Building and Planning Manager, City of Chehalis
Phone: (360) 345.2227
Address: 1321 S. Market Blvd, Chehalis, WA 98532

Signature: Amelia Schwartz
Amelia Schwartz for Tammy Baraconi **Date: August 3, 2021**

You may appeal this determination to City of Chehalis – Building and Planning Department, 1321 S. Market Blvd., Chehalis, WA 98532. You should be prepared to make specific factual objections. All substantive appeals must be filed with City of Chehalis in writing with a \$500 fee submitted by 4:00 PM on **August 17, 2021**. You may contact Amelia Schwartz to ask about the procedures for SEPA appeals.

CITY OF CHEHALIS COMPREHENSIVE PLAN

The proposed development is compatible with the following goals and policies of the City of Chehalis Comprehensive Plan.

Chapter 8, Economic Development

ED 3.3 Maintain and expand infrastructure to service current and future commercial, industrial, and institutional users.

Chapter 5, Transportation

3.6 Airport authorities should maintain and improve airport facilities to safely accommodate current and future air service demands.

CONDITIONS OF THE MITIGATED DETERMINATION OF NONSIGNIFICANCE

- An SPCC plan must be generated for the project.
- Fuel storage tanks must be double walled.
- If contaminated soils are found at the time of the removal of the tanks, the contractor must stop work immediately and notify Carol Serdar with the Department of Ecology and Community Development with the City of Chehalis before proceeding. All follow-up permits and processes identified by the agencies must be approved before work on the site can continue.

The environmental threshold determination is based on analysis of information contained in the following documents:

- Environmental Checklist
- Site Plans by Precision Approach Engineering

Notes:

1. The issuance of a Mitigated Determination of Nonsignificance does not constitute project approval. All building plans and site design must meet the following: 2018 International Fire Code, the 2018 International Building Code, the City of Chehalis Engineering Development Code (CMC Title 12) and the City of Chehalis Municipal Code (CMC Title 17) and all other applicable local, state and federal regulations.
2. The Mitigated Determination of Nonsignificance is based on the applicant developing the site in accordance with the Stormwater Plan as approved by City of Chehalis and site plan for Centralia-Chehalis Airport.
3. If contamination is currently known or observed during construction, sampling of the potentially contaminated media must be conducted. If contamination of soil or groundwater is readily visible, or is revealed by sampling, the Department of Ecology must be notified. Contact the Washington Emergency Management Division, 24/7 at 1.800.OILS.911. For assistance with clean up contact Mr. Josh Weide at 360.529.7916 with the Ecology Southwest Regional Office.
4. Erosion control measures must be in place prior to any clearing, grading, or construction. These control measures must be effective to prevent soil from being carried into surface water by stormwater runoff. Sand, silt, clay particles, and soil will damage aquatic habitat and are considered pollutants.

Any discharge of sediment-laden runoff of other pollutants to waters of the state is in violation of Chapter 90.48, Water Pollution Control, and WAC 173-201A, Water Quality Standards for Surface Waters of the State of Washington and is subject to enforcement action.

5. During construction, all releases of oils, hydraulic fluids, fuels, other petroleum products, paints, solvents, and other deleterious materials must be contained and removed in a manner that will prevent their discharge to waters and soils of the state. The cleanup of spills should take precedence over other work.
6. In the event any archaeological or historic materials are encountered during project activity, work in the immediate area (initially allowing for a 100' buffer; this number may vary by circumstances) must stop and the following actions taken:
 - a. Implement reasonable measures to protect the discovery site, including any appropriate stabilization or covering; and
 - b. Take reasonable steps to ensure the confidentiality of the discovery site; and
 - c. Take reasonable steps to restrict access to the site of discovery.

The project proponent will notify the concerned Tribes and all appropriate local, state and federal agencies including the Department of Archaeology and Historic Preservation and the City of Centralia Community Development. The agencies and Tribes(s) will discuss possible measures to remove or avoid cultural material and will reach an agreement with the project proponent regarding actions to be taken and disposition of material.

If human remains are uncovered, the City of Chehalis Police Department shall be notified first and the above steps followed. IF the remains are determined to be Native, consultation with the affected Tribes will take place in order to mitigate the final disposition of said remains.

See the Revised Code of Washington, Chapter 27.53, "Archaeological Sites and Resources," for applicable laws and statutes. See also Washington State Executive Order 05-05, "Archaeological and Cultural Resources." Additional state and federal law(s) may also apply.

7. All survey monuments must be preserved and may not be covered by dirt, asphalt, or any other material.

Thank you,
Amelia Schwartz
