

ELEVATION CERTIFICATE CITY OF CHEHALIS ORD. # 207-B

BUILDING OWNER'S NAME Goote Chevrolet Company, a Washington Corporation
 PROPERTY LOCATION (Lot and Block numbers and address if available) 2580 N. Washington Chehalis WA. 98532

I certify that the information on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.
SECTION I ELIGIBILITY CERTIFICATION (Completed by Local Community Permit Official)

COMMUNITY NO.	PANEL NO.	SUFFIX	DATE OF FIRM	FIRM ZONE	DATE OF CONSTR.	BASE FLOOD ELEV. (in AD Zone, use depth)	BUILDING IS
520104	0001	B	5/80	A6	3/88	176.0	<input checked="" type="checkbox"/> New/Emergency <input type="checkbox"/> Pro-Firm Reg. <input type="checkbox"/> Post-Firm Reg.

YES NO It is intended that the building described above will be constructed in compliance with the community's flood plain ordinance. The certifier may rely on community records. The lowest floor (including basement) will be at an elevation of 176.0 NGVD. Failure to construct the building at this elevation may place the building in violation of the community's flood plain management ordinance.

YES NO The building described above has been constructed in compliance with the community's flood plain management ordinance based on elevation data and visual inspection or other reasonable means.
 If NO is checked, attach copy of variance issued by the community.

(Community Permit Official)

SECTION II ELEVATION CERTIFICATION (Certified by a Local Community Permit Official or a Registered Professional Engineer, Architect, or Surveyor.)

FIRM ZONE A1-A30, V1-V30, A0 and AH: I certify that the building at the property location described above has the lowest floor (including basement) at an elevation of 175.92 feet, NGVD (mean sea level) and the average grade at the building site is at an elevation of 175.94 feet, NGVD.

SECTION III FLOODPROOFING CERTIFICATION (Certification by a Registered Professional Engineer or Architect)

I certify to the best of my knowledge, information, and belief, that the building is designed so that the building is watertight, with walls substantially impermeable to the passage of water and structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy that would be caused by the flood depths, pressures, velocities, impact and uplift forces associated with the base flood.

YES NO In the event of flooding, will this degree of floodproofing be achieved with human intervention?
 (Human intervention means that water will enter the building when floods up to the base flood level occur unless measures are taken prior to the flood to prevent entry of water (e.g., bolting metal shields over doors and windows). Sandbagging 2580

If the answer to both questions is YES, the floodproofing cannot be credited for rating purposes and the actual lowest floor must be completed and certified instead. Complete both the elevation and floodproofing certificates.

FIRM ZONES A, A1-A30, V1-V30, A0 and AH: See 2/1/88 Certified Floodproofed Elevation is 176.0 feet, NGVD.

THIS CERTIFICATION IS FOR SECTION II BOTH SECTIONS II AND III (Check One)
