**SEPA Checklist Routing Form and Notice of Application**

Date: June 3, 2021

File #SEPA-21-0002: Applicant proposes 21 duplexes and a single 23 unit apartment building with parking, playground, and stormwater. Units will be individually owned condominiums with common area ownership by a homeowner’s association. Project is proposed in two phases. The property is zoned RUGA, Residential Urban Growth Area. As per CMC 17.18.020 this is a permitted use in this zone with a conditional use permit. Lewis Co Parcel number 010799001000. Please note that we are seeking comment prior to making a threshold determination. No decision has been made at this time.

**\*\*The comment period ends at 5:00 pm on June 17, 2021. \*\***

The checklist has been to the following agencies identified with an ‘X’ below.

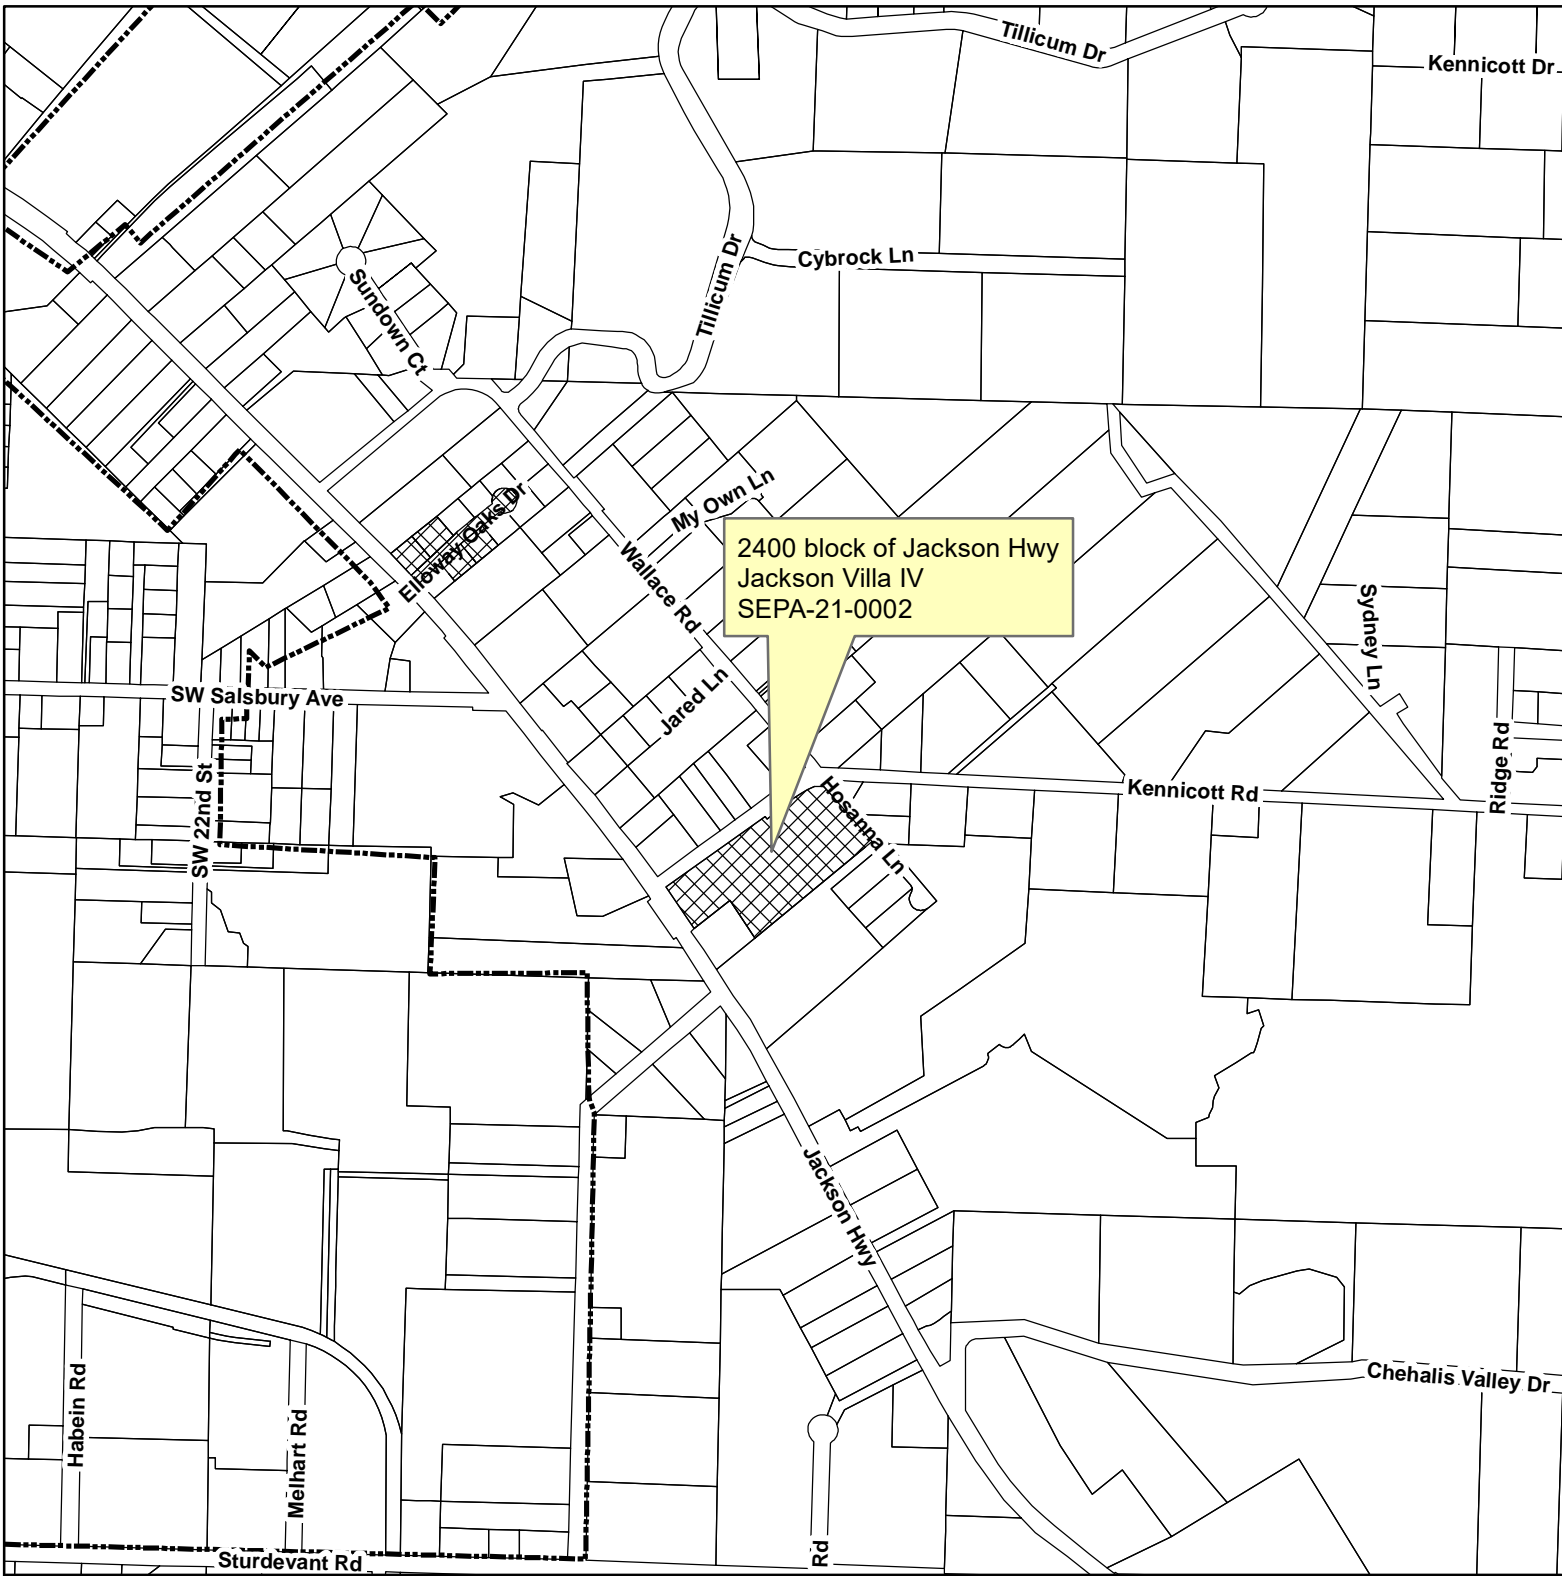

X	Chehalis Building Official	X	WA Dept of Ecology
X	Chehalis Engineering	X	SW WA Clear Air Agency
	Lewis County Environmental Health		WDFW Region 5
	Centralia Community Development		WA DNR Pacific Cascade Region
X	Lewis County Community Development		Chehalis School District
	Chehalis-Centralia Airport	X	Twin Transit
X	Chehalis Fire Department	X	Cowlitz Indian Tribe, Attn: Taylor Aalvik
	Lewis County Engineering	X	Chehalis Indian Tribe Attn: Dan Penn
X	Dept of Archaeology and Historic Preservation		WSDOT SW Region, Attn: Jeff Barsness

Please send any comments, conditions or requests for additional information to:

RE: Jackson Villa Expansion 4  
Project: Multi-Family Development  
Parcel #: 010799001000

Tammy,

Please accept this narrative and attached plans for Jackson Villa Expansion. The following narrative is intended to provide an overall direction of the development and help address any issues that might arise throughout this process.

### **Existing Condition**

This project consists of 1 parcel listed above in Chehalis' southern UGA area. The site currently is undeveloped land with two small sheds on it. The site has access from Kennicott Road.

Wet utilities (water and sewer) are currently adjacent to the site located along Jackson Hwy and Kennicott Road. Sewer and water are from City of Chehalis.

Dry utilities (electric and communications) are adjacent to the property. Overhead services are located adjacent to the site along Jackson Highway and Kennicott Road. Lewis County PUD is electric provider and Hughes Net/Comcast is communications.

### **Proposed Improvements**

This project proposes to build 21 duplexes and a single 23 plex with parking and playground. Dwelling units will be individually owned condominiums with the common area ownership by a HOA. Private driveways and utilities will be extended onsite. Onsite parking will be provided. A new bus stop with mail box cluster is proposed along Kennicott Road adjacent to the site.

### **Zoning**

The project is zoned R-UGA. Condominiums appear to be an allowed use within this zone.

### **Water**

Public water service will be extended through the development from the existing City of Chehalis water mains in Kennicott Road. 4 block banks of meters are proposed with individual lines extending to each residence.

### **Sewer**

Public sewer will be extended through the development from the existing City of Chehalis sewer mains. Maintenance agreements are expected to be signed relieving the City of responsibility onsite. Individual condo owners will maintain in residence piping while HOA will maintain common area sewers. City will maintain once in right of way.

### Stormwater

The development is anticipated to require a full drainage report. Site will be constructed in 2 phases with each phase being fully compliant with stormwater regulation on its own. Phase 1 will utilize catch basin filtration and underground pipe detention systems. Phase 2 will utilize standard biofilter and pond detention systems. Full details will be provided in the civil construction plans.

### Critical Areas

A mapped wetland is located onsite. The wetland has been delineated and scored by Loowit Consulting Group. Phase one will adhere to buffers for this wetland. A wetland bank use plan has been prepared for phase 2. Once the bank use plan has been approved and credits purchased this wetland will be removed completely.

### Dry Utilities – Power/Communication

Existing overhead facilities are expected to be brought underground and then extended through the project site to each lot. We will work with Lewis County PUD and other dry utility providers to develop an appropriate plan on how to properly extend these facilities.

### Roads/Access

The site currently has direct access from Kennicott Road. Each phase of this project will have a separate entrance on Kennicott which will eventually create a looped internal privately owned access. A traffic study was prepared by Heath and associates. This study identified proposed vehicular trips expected and how they will affect the surrounding roadways including potential upgrades to Jackson Highway. The report also analyzed project access locations and required site distance. All traffic report recommendations have been integrated into the Civil plans.

### Buildings

The two existing sheds will be demolished. Demo permits will be applied for and approved prior to removal. New buildings include twenty-one duplexes and one 23-unit structure. All buildings have been vested under the 2015 IBC and will obtain appropriate building permits prior to construction.

Thank you for accepting all applications and a full plan set. Feel free to call or email if you have any questions.

Sincerely,

Aaron Fuller, PE

# Jackson Villas IV

## SEPA ENVIRONMENTAL CHECKLIST

### ***Purpose of checklist:***

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

### ***Instructions for applicants:***

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

### ***Instructions for Lead Agencies:***

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

### ***Use of checklist for nonproject proposals:***

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the [SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS \(part D\)](#). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

## ***A. Background***

1. Name of proposed project, if applicable:

*Jackson Villas IV*

2. Name of applicant:

*Fuller Designs*

3. Address and phone number of applicant and contact person:

*1101 Kresky Ave Centralia, WA 98531 (360) 807-4420 Cassandra Fuller*

4. Date checklist prepared:

3/03/2021

5. Agency requesting checklist:

City Of Chehalis

6. Proposed timing or schedule (including phasing, if applicable):

Phase one will be on the upper portion of the project in 2021 and the lower portion will be started once the wetland bank use plan is approved.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Not at this time

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

Wetland report prepared by Loowit Consulting. Geology Report prepared by All American Geologist.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No

10. List any government approvals or permits that will be needed for your proposal, if known.

Building Permits, Wetland Bank use, PUD, grading, and road permits

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

21 Duplexes and one 23-plex of condominiums to be constructed in 2 phases. Roads, storm systems, and associated utilities will also be constructed. Site is 4.32 acres.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

Section 03 Township 13N Range 02W PT LT 8 SE RD BLK 1 RICHARDT'S RPLT BLK 4-6 PARCVIA ADD PRCL B BL-09-148 335384. No site address yet. See included site plan.

## B. Environmental Elements

### 1. Earth

a. General description of the site:

Medium Slopes from north to south.

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other

Consistent slope through site but not hilly

b. What is the steepest slope on the site (approximate percent slope)?

The Steepest slope on the site is about 20%.

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

The soils are galvin silt loam and scammon silty clay loam. No long term commercially significant soils are onsite.

- d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.  
*No. See prepared geotechnical report*
- e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.  
*19000cy of fill and 450cy of cut. 4.32 acres affected. source is not yet decided however will be local permitted source close to project site*
- f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.  
*Erosion affecting surrounding properties is unlikely. Appropriate TESC measures will be in place prior to construction start. Once site is stabilized erosion is highly unlikely.*
- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?  
*Approx 70% of site will be covered with impervious surfaces after project construction.*
- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:  
*Erosion control measures will be in place and BMP's will be implemented.  
 Measures include: silt fence, high visibility fencing, construction entrances, seeding, plastic covering, etc.. See TESC plan and SWPPP.*

## 2. Air

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.  
*During construction you will have emissions and dust from standard construction equipment. After construction standard residential emissions are expected.*
- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.  
*No.*
- c. Proposed measures to reduce or control emissions or other impacts to air, if any:  
*Exhaust systems on construction equipment and de-watering for dust.*

## 3. Water

### a. Surface Water:

- 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.  
*Small unnamed mapped wetland on the project site. Wetland report from Loovit Consulting Group is attached. Wetland delineation, mitigation, and bank use plan have been prepared to remove this wetland entirely.*
- 2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.  
*Yes. the entire wetland is expected to be filled once bank use plan is approved and credits can be purchased.*
- 3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.  
*Approximately 15000cy of material will be placed in wetland area.*
- 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.  
*No withdraws or diversions. storm water will be directed to the same discharge point at the south of the site.*

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

*No it does not lie within a 100- year floodplain.*

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

*No.*

**b. Ground Water:**

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

*NO. Domestic water will be provided by the City of Chehalis. Minor infiltration is expected to discharge to groundwater through stormwater detention systems after treatment.*

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

*NO. The sewer will be ran to the City of Chehalis sewer system.*

**c. Water runoff (including stormwater):**

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

*Rain water will be collected and treated through approved filter and biotreatment systems. Pipe and pond detention systems will discharge at natural locations.*

2) Could waste materials enter ground or surface waters? If so, generally describe.

*Approved treatment systems are to be installed with appropriate maintenance agreement. Waste contamination is unlikely.*

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

*NO*

**d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:**

*Yes standard TESC measures and BMPs will be implemented. See erosion control plans.*

**4. Plants**

**a. Check the types of vegetation found on the site:**

- deciduous tree: alder maple, aspen, other
- evergreen tree: fir, cedar, pine, other
- shrubs
- grass
- pasture
- crop or grain
- Orchards, vineyards or other permanent crops.
- wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

The field where the project will be developed will be removed and covered with buildings, asphalt roads, and lawn area.

c. List threatened and endangered species known to be on or near the site.

None.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

Manicured lawns will be placed onsite. Pond areas will be seeded with biofiltration seed mix.

e. List all noxious weeds and invasive species known to be on or near the site.

Some minor scotch broom and standard thistle weeds were observed onsite. All weeds or invasive species will be removed.

## 5. Animals

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:  
 mammals: deer bear, elk, beaver, other:  
 fish: bass, salmon, trout, herring, shellfish, other \_\_\_\_\_

b. List any threatened and endangered species known to be on or near the site.

None observed or known to be on or near the site.

c. Is the site part of a migration route? If so, explain.

The site is part of the Pacific Flyaway Route.

d. Proposed measures to preserve or enhance wildlife, if any:

None.

e. List any invasive animal species known to be on or near the site.

Not known. Perhaps mosquitoes during warm months.

## 6. Energy and Natural Resources

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

*Electric and natural gas is anticipated to be used as the primary energy source for the project. Solar and wood stove may be installed to supplement*

- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

*No*

- c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

*Project has been vested under the 2015 IBC and will comply with energy conservation requirements listed in that code.*

## 7. Environmental Health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

*No*

- 1) Describe any known or possible contamination at the site from present or past uses.

*None known*

- 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

*Natural gas pipelines currently exist in roads adjacent to the project site. No contamination or indication of contamination has been observed.*

- 3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

*Fuels for equipment will be used and stored properly on site during construction. Standard household chemicals will be onsite during operation.*

- 4) Describe special emergency services that might be required.

*None. Standard fire, police and ambulatory services are expected.*

- 5) Proposed measures to reduce or control environmental health hazards, if any:

*Safely store all fuels for equipment. Implement source control BMPs. See SWPPP*

### b. Noise

- 1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

*None. Standard traffic noise from the adjacent road currently exists.*

- 2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

*Standard short term construction noise and standard long term residential noise.*

*Construction is expected to occur from 6am to 6pm.*

- 3) Proposed measures to reduce or control noise impacts, if any:

*Noise for construction would only happen during the week days.*

## 8. Land and Shoreline Use

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

*The site and surrounding properties are currently zoned R-UGA. The property has mostly residential around it with a vacant property to the East.*

- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

*No*

- 1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

*No*

- c. Describe any structures on the site.

*Two small shed storage buildings*

- d. Will any structures be demolished? If so, what?

*Yes, two small sheds.*

- e. What is the current zoning classification of the site?

*The site currently is zoned R-UGA.*

- f. What is the current comprehensive plan designation of the site?

*urban growth area - residential*

- g. If applicable, what is the current shoreline master program designation of the site?

*Not applicable, no shorelines onsite or within 300' of the site*

- h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

*GIS mapping shows a small wetland area.*

- i. Approximately how many people would reside or work in the completed project?

*65 dwelling units housing approximately 195-260 people (3-4 per household)*

- j. Approximately how many people would the completed project displace?

*Zero*

- k. Proposed measures to avoid or reduce displacement impacts, if any:

*None*

- L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:  
Project will be approved through hearings examiner process, public meetings, and city staff approval processes.
- m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:  
None Proposed

**9. Housing**

- a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.  
65 units with middle income housing
- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.  
None
- c. Proposed measures to reduce or control housing impacts, if any:  
None

**10. Aesthetics**

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?  
33 feet is tallest structure. Wood and hardiboard is principal exterior materials.
- b. What views in the immediate vicinity would be altered or obstructed?  
None
- b. Proposed measures to reduce or control aesthetic impacts, if any:  
None

**11. Light and Glare**

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?  
None to minimal. Standard residential glare from reflective building materials like windows is expected. Glare could be expected during daylight hours (duh!)
- b. Could light or glare from the finished project be a safety hazard or interfere with views?  
No
- c. What existing off-site sources of light or glare may affect your proposal?  
None
- d. Proposed measures to reduce or control light and glare impacts, if any:  
None

## 12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity?

*There will be a small park located on site. Also, city parks, golf course, and rivers are located within a few miles.*

- b. Would the proposed project displace any existing recreational uses? If so, describe.

*No*

- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

*An onsite storm facility designed as a shallow pond will double as a small park during dry weather.*

## 13. Historic and cultural preservation

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

*A standard residential building on adjacent property was built in approximately 1920 and may potentially be historic. The building appears to be in fair to poor condition*

- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

*None known.*

- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

*WIZAARD, GIS maps*

- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

*No proposed measures or permits required. While adjacent house shows on GIS mapping as potentially historic, actual observation indicates a standard residential home in fair to poor condition which is not listed on a historic record.*

## 14. Transportation

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

*Kennicott Road will serve the site. See plans provided*

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

*Yes the project will construct a new Twin-Transit bus stop at its proposed access to Kennicott Road.*

- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

*At least 136 parking spots will be provided.*

- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

*There will be a bus pull off on Kennicott Road.*

- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

*NO*

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

*505 daily trips are expected from the site. 32 AM and 39 PM peak hour trips are expected. See traffic report prepared by Heath and associates. FYI, traffic report was prepared during early design when 69 dwelling units were proposed. Report is thus conservative.*

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

*NO*

- h. Proposed measures to reduce or control transportation impacts, if any:

*None*

## **15. Public Services**

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

*Yes, standard increases in all services listed are expected. Increases would be consistent with adding 65 multifamily residences.*

- b. Proposed measures to reduce or control direct impacts on public services, if any.

*Required impact fees will be paid.*

## **16. Utilities**

- a. Circle utilities currently available at the site:

*electricity, natural gas, water, refuse service, telephone, sanitary sewer*, septic system, other \_\_\_\_\_

- c. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

*Adjacent public utilities listed above are proposed to be extended onsite to serve new residences. Trenching, pipe installation, and other standard utility extension techniques will be used to construct the services.*

### C. Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

### D. Supplemental sheet for nonproject actions

(IT IS NOT NECESSARY to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

Proposed measures to avoid or reduce such increases are:

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

3. How would the proposal be likely to deplete energy or natural resources?

Proposed measures to protect or conserve energy and natural resources are:

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks,

wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

Proposed measures to protect such resources or to avoid or reduce impacts are:

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Proposed measures to reduce or respond to such demand(s) are:

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.
