PUD Substation Park

As part of the Chehalis Community Renaissance Teams overview of 2012 and a generous opportunity by the Lewis County PUD the two combine to beautify a property formerly used for PUD's substation on Main Street at Quincy Avenue. Designing this property properly will allow an end result of a Main Street Chehalis park that could accomplish the following from the Chehalis Renaissance Teams action plan while helping beauty and create a welcoming area entering the City of Chehalis downtown area.

- *Upgrade transit furnishings -
- *Improve pedestrian-friendly furnishings -
- *Install landscaping -
- *Install artworks - using a competitive design jury process to select local artist works to display on sale consignment at select places for 1-2 year intervals.

PUD Substation Park Design Concepts

- 1- Define name of park i.e. "Power-Free Park" - "PUD Park" - "Chehalis Art Park"
- 2- Utilize aspects of the substation within in the park, i.e. - insulators integrated into low fence along main street, concrete as pedestals for art.
- 3- Create restroom that encompasses the theme of park, i.e. - Composting toilets, mural paintings on wall, and unique structure following theme of park.
- 4- Provide a welcome sign for the City of Chehalis and Renaissance directional kiosk.
- 5- Create a pet area with doo-doo bag kiosk.
- 6- Provide picnic tables with artistic flare and easy access. Table contest could be provided for establishing unique tables.
- 7- Establish one installation art piece within park that would set the park tone and serve to be an anchor and permanent landmark for park.
- 8- Establish four smaller concrete pedestals for smaller replaceable art pieces with anchoring for art to be safely on display for public.
